

Please do not allow any changes to take place that would limit the XM Radio service that I use in any way. Since it is a subscription based service, I don't believe that Congress, or the FCC should be allowed to limit what information, or entertainment I should have access to via the XM service. I believe that if local radio stations want to be competitive, they will have to improve there programming. I don't listen to XM because it is commercial free, I listen to it because the local stations don't service my needs adequately. I don't fit into a large enough demographic for them to play what I pay to listen to on XM. Being forced to listen to top 20 or top 40, will significantly limit my exposure to good music, and other forms of intellectual stimulation. I still listen to certain programs broadcast locally, but I still enjoy the choice to listen to something else, when the mood strikes.
